

The BitDegree scholarship enabled Amna to get a job

“My life has definitely changed. I managed to get a job with a local advertising firm and I now use the skills I’ve learnt to design logos for them. **I’m now in a better position to support my family and meet their day to day needs.**”

Amna Nawaz From **Pakistan**

Scholarship size **\$15**

Learned **How to Use Adobe Illustrator to Design Vector Graphics and Digital Illustrations**

Blockchain automates P2P education donations

Transparent governance of the process

No intermediaries involved

Achievement-based payments through smart-contracts

Cryptocurrencies reach the unbanked

Sponsoring any learner globally is as easy as shopping online

Micro-Scholarship Receiver: Charity

“Charity wants to learn data science so she could be a valuable asset and increase the level of security in her organization to protect herself and other people.”

Charity's story

I really want to get involved in the world of data revolution so I could add value to my life and other people's lives. I have tried so many things in life and they didn't pay off because I was lacking proper data science skills. This is also the reason why I haven't been on the right career path as well. With this innovative course, I can change my world and the world of others. Studying this course will be the best way for me and the organization to move forward. I want to take part in the movement and make a career out of it.
