Internet of Values 2.0

- *COMMONSHOOD* is designed to **democratize** local financial instruments to support **local communities** and **urban commoning** efforts
- In analogy with the Web 2.0, *COMMONSHOOD* allows **non-technical users** to **create** and **distribute** new types of **tokens**
- *COMMONSHOOD* promotes an **Internet of Values 2.0** revolution

Technology and use cases for the communities

- **Smart contract factory** to create new types of tokens
- Extensible platform based on **Ethereum technology** and **ERC standards** for interoperability
- Integration with **FirstLife**
- **One single app**
- **Prepaid cards**
- **Discount coupons**
- **Crowdsales**
- **Access rights**
- **Group buying**
- **Time banks**
- **Complementary currencies**
- **Digital collectibles**
- **and more**
