DECENTRALIZED IDENTITY
FOR BASIC SERVICES

EIC HORIZON PRIZE
**BLOCKCHAINS
FOR SOCIAL GOOD**

FEBRUARY 10TH, 2020

THIS IS THE PROBLEM AND THIS IS THE SOLUTION

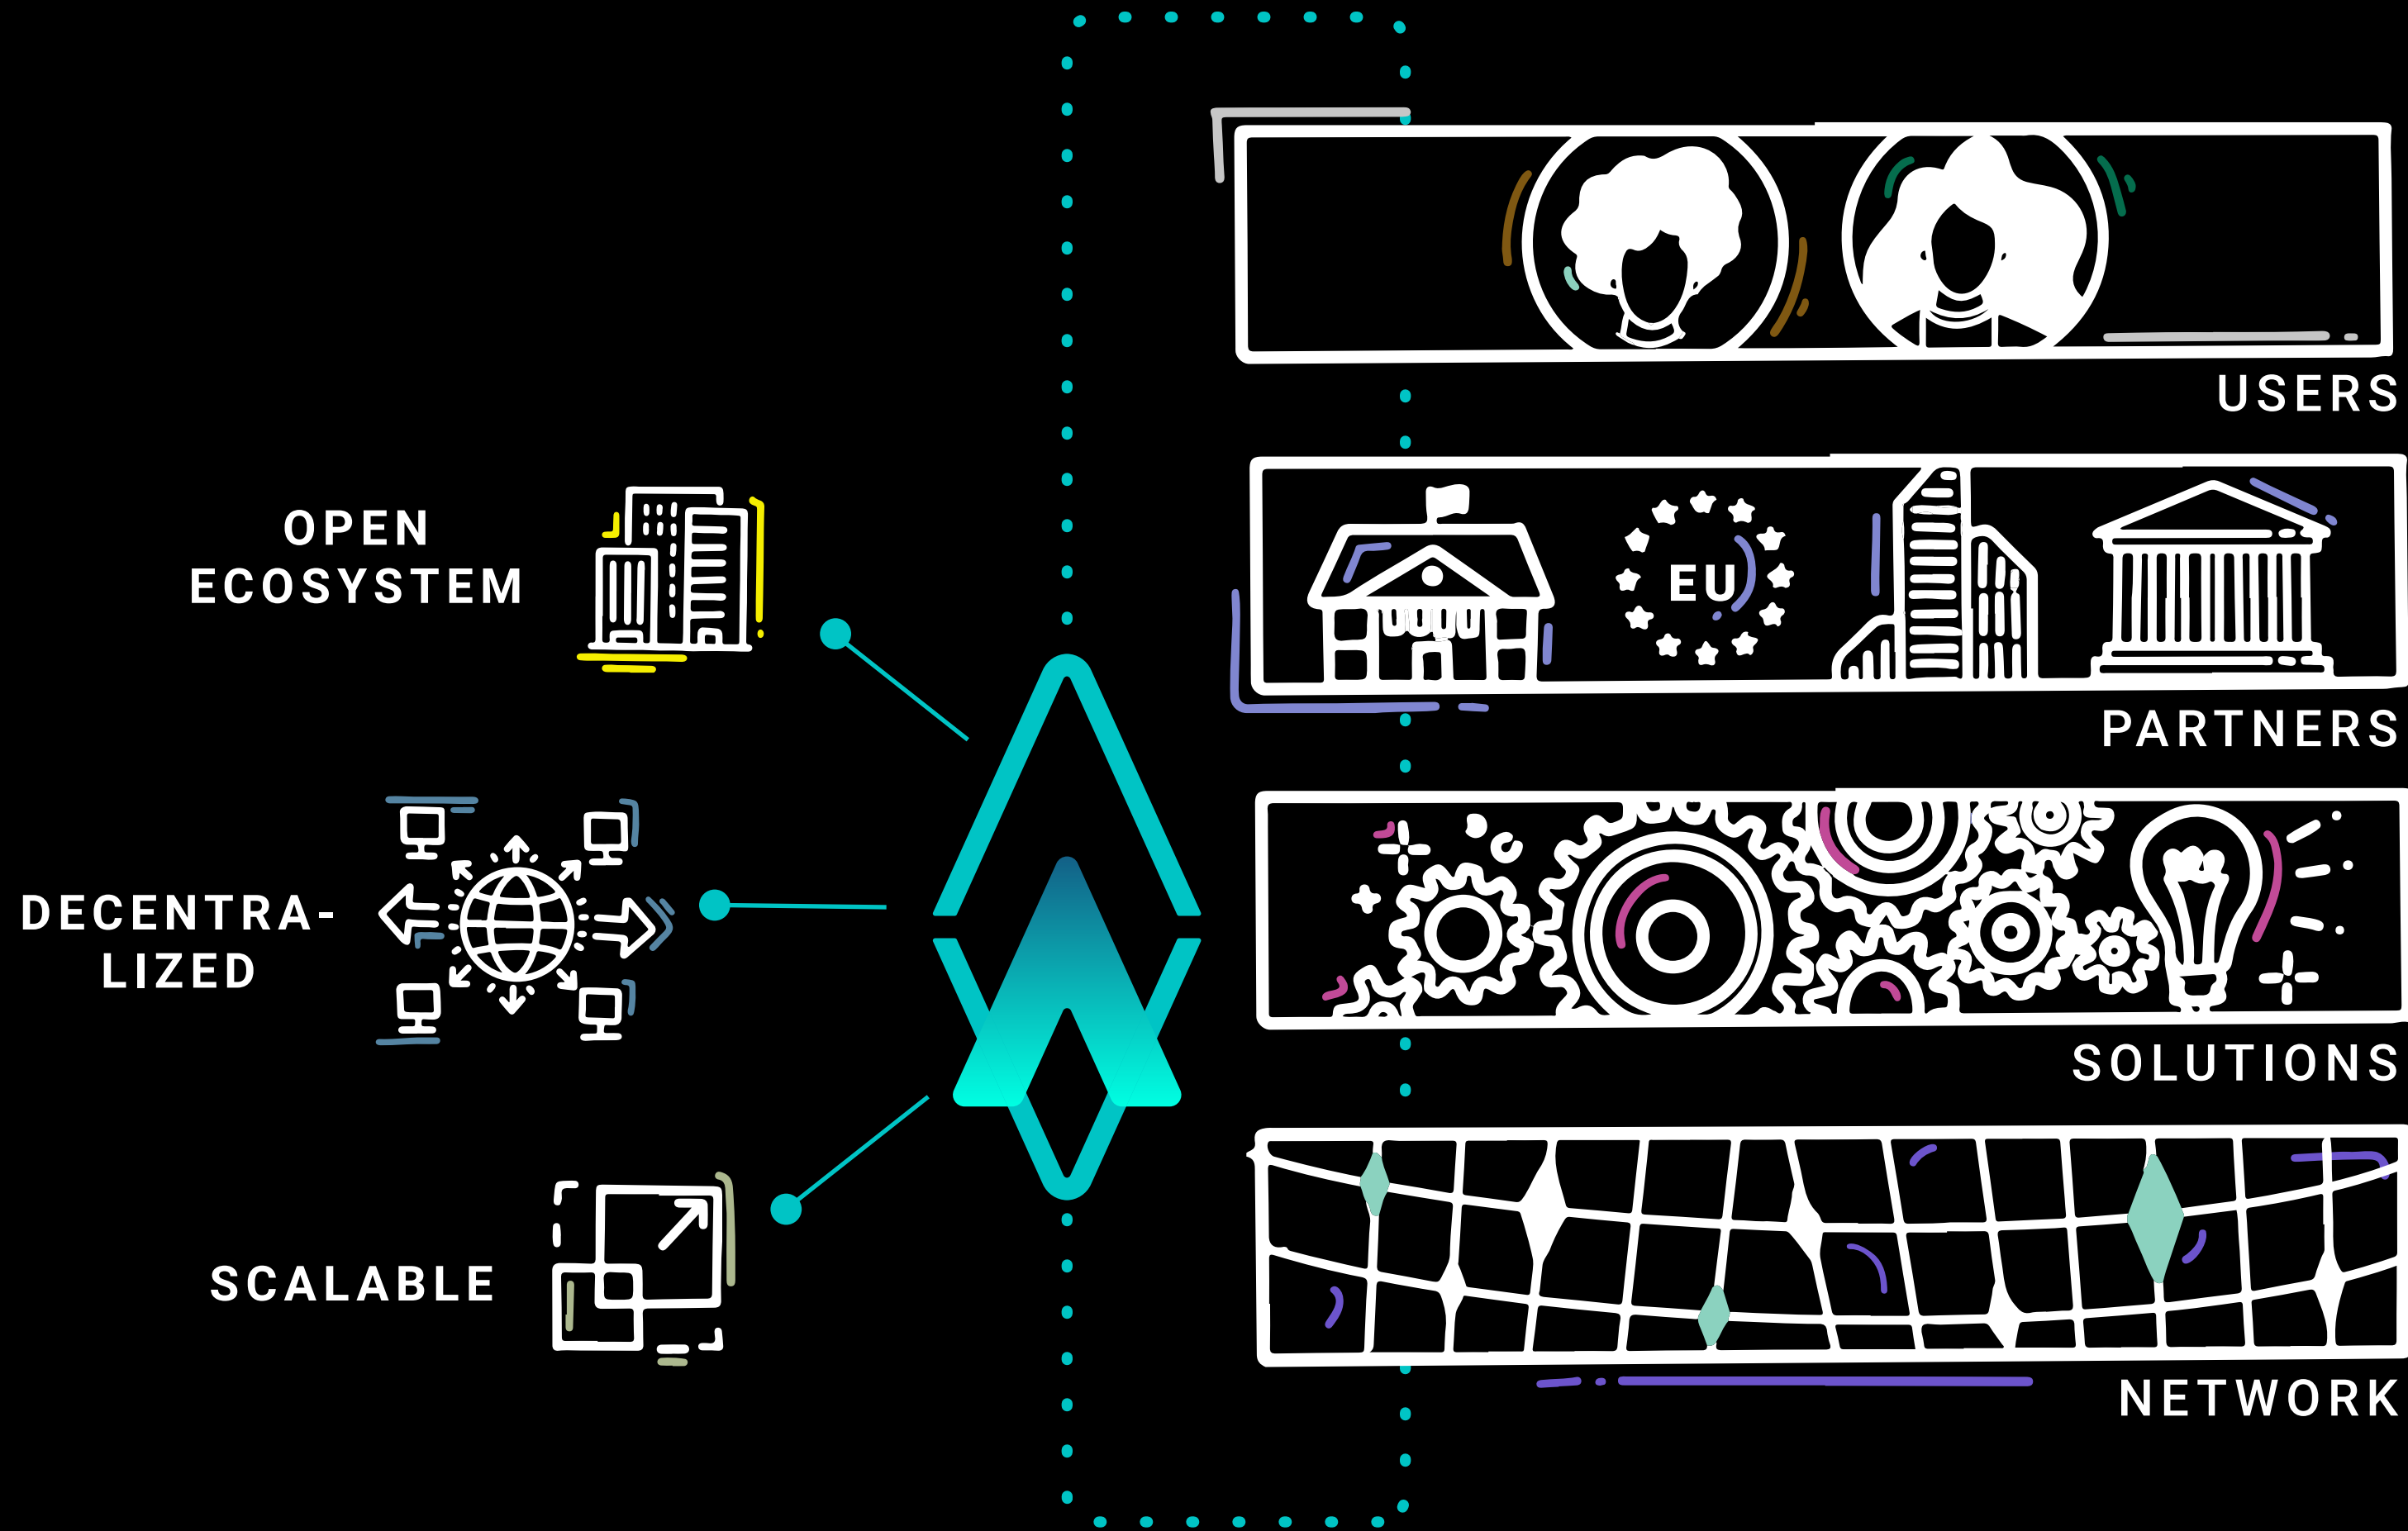

This is about promoting social inclusion through partnerships between companies and Government together.

This is about inclusion for 20+ M people at risk of exclusion according to Eurostat.

This is about how using Blockchain and Decentralized Identity makes it happen.

THIS IS ALASTRIA

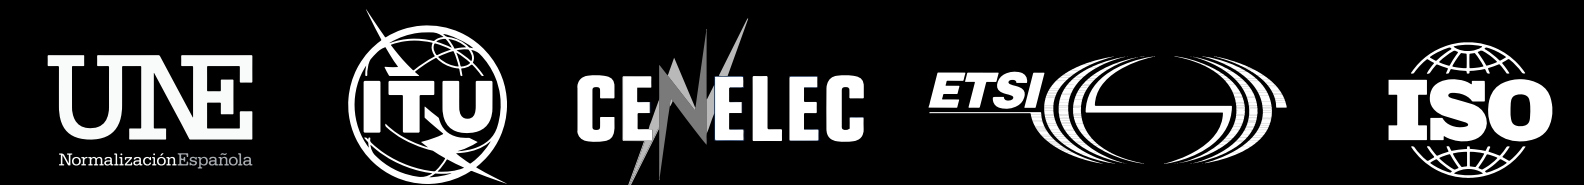

We are Alastria, a non-profit association that promotes the Digital Economy through the adoption of DLT.

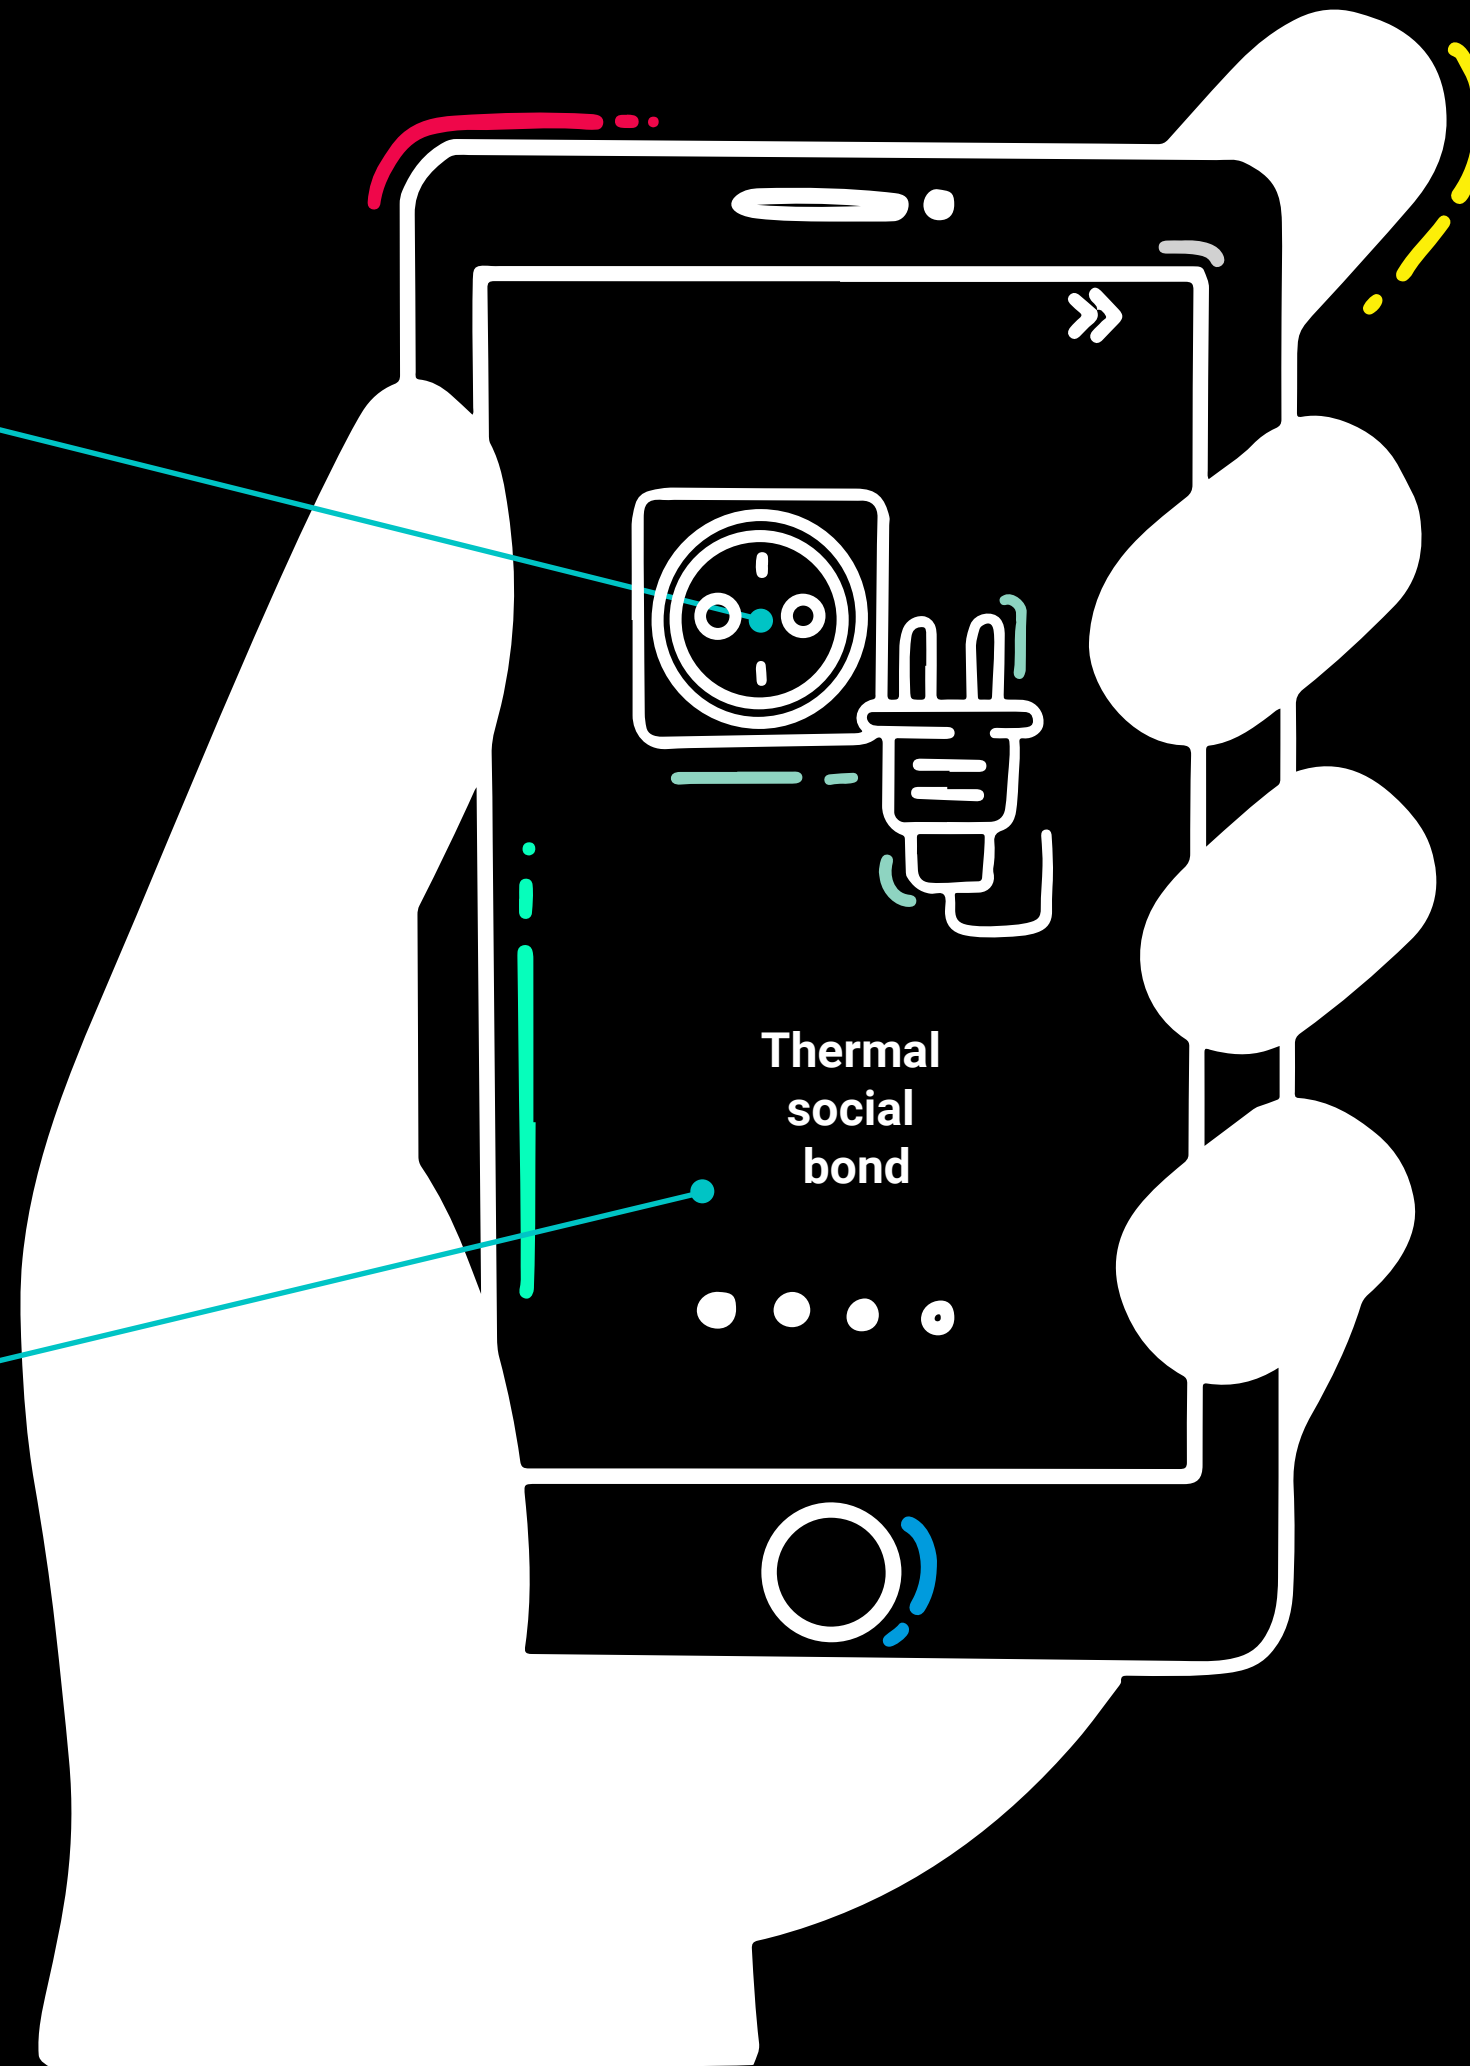

We are a digital ecosystem that provides public-permissioned networks with 100+ nodes.

We are the first European multi-segment consortium promoted by enterprises engaging Academia and Government (500+ members).

We are actively involved in international standardization results in the DLT & SSI realm.

THIS IS ALASTRIA SOLUTION

Our solution is based on three elements: (1) the Alastria ID, our decentralized identity model, (2) the network and (3) the DApp's independently developed by Alastria's membership.

Our solution allows any user to create his/her own ID in an easy and successful way. It enables the users to manage his/her social benefits with no guidance.

The user's personal information is strictly protected in compliance with GDPR.

THIS IS OUR SOLUTION FOR THE PROBLEM

Alastria combines:

A stable blockchain permissioned network

A strong decentralized identity implemented and

A clear ecosystem within the local government and the basic services providers (energy, water, health, payments).

...to include in financial terms and in the short term the people at risk of exclusion.

“ Together we change the world ”
