LEDGER Mission
Citizens retain control over their data

LEDGER promotes alternative models where data is a common good owned by citizens and wealth created by data-driven platforms is equally distributed.
To empower people to solve problems using decentralised technologies such as blockchain, peer to peer or distributed ledger technologies
LEDGER is funding

32 projects building MVPs where privacy by design, open software and data sovereignty are at the core of the proposition
The Programme

- Up to €200k equity free
