Type of action: HORIZON-CSA

D3.1 NGI MEDIA MAPPING AND DATABASE

NGI media landscape and NGI media database

Revision: V 0.8

Work package	WP 1
Task	Task 1
Due date	31/03/2023
Submission date	05/05/2023
Deliverable lead	Tipik
Version	0.8
Authors	Pierre-Loïc Nihoul
Reviewers	Frederique Luca, Giovanni Maccani, Anna Higuera, Marie-France Locus, Eugenia Kyriotis

Abstract	This document presents the action plan aiming at raising the awareness of NGI in traditional and digital media across the European Union as well as an upgrade of the NGI media landscape and enlarged version of the NGI media database.
Keywords	Media Relations, Media Plan, Press, Coverage, Journalists, Outreach, News, Media Monitoring, Articles, Mentions, Earned Media, Media Engagement, Database

EXECUTIVE SUMMARY

The **NGI4ALL.E Media Plan** provides detailed information on the media outreach activities that the NGI Outreach Office will undertake all along the project implementation (from July 2022 until June 2025).

The Media Plan is followed by the **Media Mapping and Database**.

In this document, we outline the process and description of work linked to the NGI media outreach activities, including:

- Defining specific goals and media targets for media outreach, focusing on key EU Member States and tech policy publications.
- Developing a clear messaging framework and content strategy on priority topic areas for use with media.
- Identifying and engaging with relevant journalists, bloggers, and influencers in the tech policy sphere, with a focus on all 27 EU countries, and leverage priority contacts from 11 of them: Germany, France, Italy, Spain, the Netherlands, Poland, Hungary, Czech Republic, Romania, Greece, and Estonia. EU Council Presidency countries will benefit from a special attention during their 6-months momentum
- Creating and distributing NGI press releases and media materials at key milestones and events related to NGI projects, with a minimum two-week lead time for press releases.
- Facilitating media interviews with NGI project owners and European Commission spokespersons, as appropriate, in a timely and responsive manner.
- Monitoring and tracking media coverage and engagement metrics to assess the impact of our outreach efforts and refine our approach as needed.

In the annexes 1 and 2, you will find the detailed lists of media contacts.

WP	Work Package
NOO	NGI Outreach Office

1 INTRODUCTION

NGI is moving into a new phase. Building on the achievements to date, the NGI Outreach Office aims to increase the reach and impact of NGI's communication efforts.

To 'level up', the NGI Outreach Office is creating a framework in view of taking a more proactive and data-driven approach to communicating with the NGI community, including with media (considered a channel and an audience in the context of NGI's communication strategy).

With this in mind, the NGI Outreach Office has prepared a plan outlining the goals, approach, and main deliverables related to its media activities over the next 3 years. This media plan is intended to support the new NGI communication strategy and integrates the learnings from the NGI communication audit as they relate to media relations activities.

By generating positive NGI news stories in traditional media, the NGI Outreach Office can help build trust and credibility for NGI's vision and mission amongst key audiences i.e. innovators (entrepreneurs, start-ups, SMEs, developers, Open-Source communities (both hardware & software) with an emphasis on gender minorities), researchers / scientists (researchers both from academia and industry such as PhD students, Postdocs, early career researchers, research leaders and top academics) and policy makers (regulators, legislators, national contact points and Future Internet Forum), which is essential for its long-term success.

Upon approval of the plan, the NGI Outreach Office will implement the approach, in particular the media preparedness activities. The ongoing work already planned will continue in parallel while the plan is being implemented. Progress updates on the implementation of the plan will be provided at future meetings and in activity reports.

1.1 OBJECTIVES

The overarching goal of the media plan is to generate visibility for NGI via traditional media channels and help position NGI as a leading voice in the public debate on the future of the internet and related emerging technologies.

However, we are not generating visibility for the sake of visibility. In the context of the NGI's communication strategy, the media has an important role to play in shoring up awareness and support for NGI's vision, activities and projects in EU Member States.

The goal will be to secure coverage for NGI in publications read by key stakeholders, such as policymakers, industry leaders, and the general public. Earned media (news coverage and mentions in articles), is particularly important in this context because it is more credible than other types of media in a communication strategy.

The implementation of the media plan will help the NGI communication strategy to reach objectives 3 ("Scale-up and reach out") and 4 ("Diversify and evangelise") by reaching out to new stakeholders, particularly those who are under-represented in the NGI community.

By adopting a more structured and proactive approach to media relations, the NGI Outreach Office aims to capitalise on opportunities to generate visibility for NGI and continue strengthening, widening and deepening NGI's network of media contacts.

Although it is not possible to guarantee media interest or coverage, based on the work to date, the NGI Outreach Office is able to set realistic targets around its media relations work. In terms of quantitative KPIs, the NGI Outreach Office aims to:

- **Generate around 180 placements** (articles and mentions of NGI) in 16 to 20 EU countries per year

We will do this by:

- **Reviewing and updating the NGI media lists** with relevant contacts in 27 EU countries
- **Reaching out to around 240-270 media contacts** in 20 EU countries per year (exact number will depend on updated media target lists) and in 27 EU countries until July 2025
- **Reaching out proactively to our media contacts 8 to 12 times per year** following a targeted and tailored approach
- **Organising/facilitating between 6 and 8 interviews or media requests per year** between journalists and NGI spokespersons
- **Drafting up to 5 content items per year** (including 1 Opinion Editorial and 2-3 press releases) reflecting on NGI-related policy, development or announcement news
- **Organising a bi-monthly media relations planning/progress meeting** with spokespersons and NGI Outreach Office
- **Updating the media tools** (online press kit and press release template)
- **Collecting newsworthy information** from NGI projects

FIGURE 1 : PRESS KPIs from Communication and Marketing Strategy and Plan D1.1

Media database	New entries for all EU MSs and ACs
Media mapping	270 per year
Media contacts per year	~200-300 journalists activated per year
EC officials' interviews	6-8 per year
Placements or media mentions	6-8 per year per EU Member State (up to 20 countries)

1.2 KPIS AND EVALUATION

Based on the targets above, the NGI Outreach Office will use the following KPIs to evaluate the effectiveness of our media relations efforts.

- **Number of media articles and/or mentions (coverage):** we will monitor for any online mentions of NGI through the creation of a search query based on keywords in our media monitoring tool. The articles will be collated in an Excel tracker and a clippings book with links to each article.
- **Type of publications:** we will analyse the type of media publications targeted in NGI media outreach efforts and any resulting coverage (trade, consumer, specialised blogger etc.). We will ensure the lists include relevant publications.

- **Geographic spread of coverage:** we will monitor the number of articles published per country to evaluate the effectiveness of our approach in key countries for NGI (are we managing to expand the reach?).
- **Potential reach:** our media monitoring tool can provide analytics on the potential reach of the media coverage achieved, i.e., how many readers or users were exposed to NGI media articles (readership and circulation numbers).
- **Media requests and interactions:** we will track all media interactions such as interviews or quote requests in an Excel tracker detailing the date of the request, the name of the journalist and other important details.

To monitor media coverage, we will use CISION, our media database and tracking tool. It's important to note that we can monitor for coverage in online media only. We cannot monitor broadcast or print media due to budget limitations.

As stated previously, we cannot guarantee coverage, as journalists have editorial independence and the decision to cover a particular story ultimately rests with their editor or publication director. However, coverage is not an end in itself. We must, therefore, find other ways to measure the impact and effectiveness of our work.

Other actionable and qualitative metrics to measure success of media relations:

- **Are we happy with the headlines?** For instance, if the press release headline and article headlines are too far apart, messages are not heard or understood as they were intended, and need refining.
- **Does the message land with the media?** We can use a word cloud to analyse mentions and if the words you see are too far apart from your desired narrative, messages need refining – this action can be done with our CISION tool.
- **Are we building relationships?** Immediate coverage is not an end in itself. We may have generated zero coverage but managed to organise content-related background briefings with key correspondents on our topics. They see us as a valuable resource and are more likely to call to request a quote, if they need advice or clarification etc.

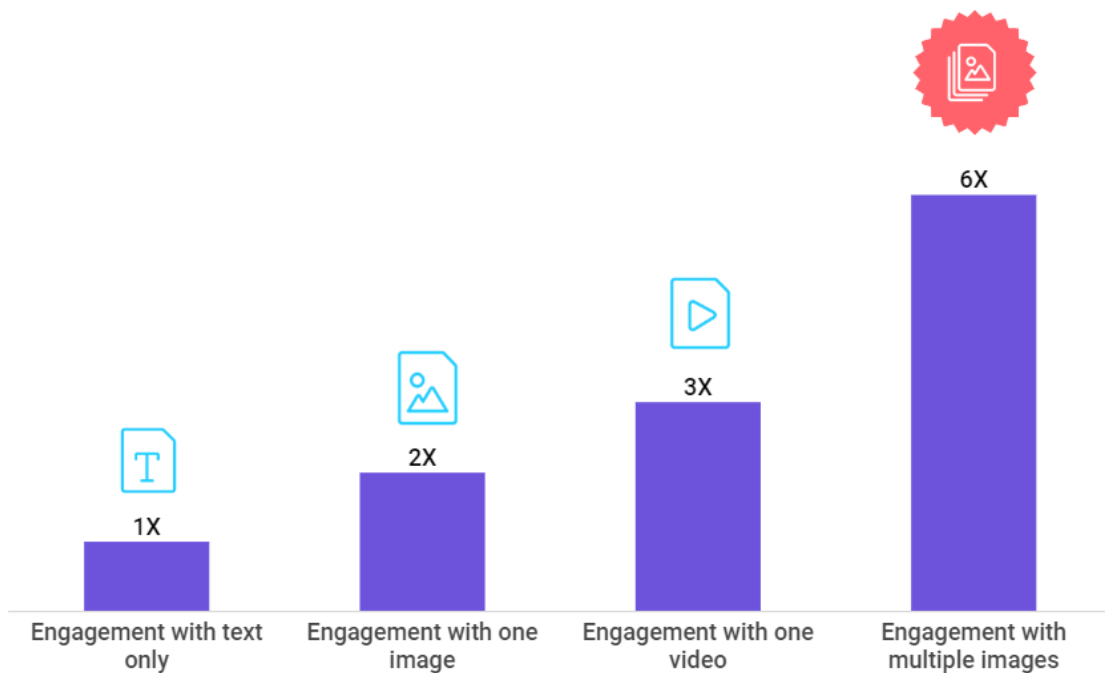

2 PRELIMINARY CONSIDERATIONS

2.1 TODAY'S MEDIA LANDSCAPE

Today's media landscape faces limited bandwidth for news coverage, with ongoing global crises like COVID-19 and the war in Ukraine dominating headlines. As a result, newsrooms struggle to cover a broad range of important stories with limited resources. Journalists are under pressure to deliver news quickly with fewer resources, leading to a trend of 'churnalism'¹ and a lack of depth in news coverage.

Furthermore, dwindling newsrooms and economic pressures have reduced traditional news outlets and resources, leaving editors and directors with tough decisions to make. Journalists must now focus on audience engagement and multimedia content, with more than half stating that multimedia makes them more likely to cover a story.

FIGURE 2 : CONTENT AND ENGAGEMENT²

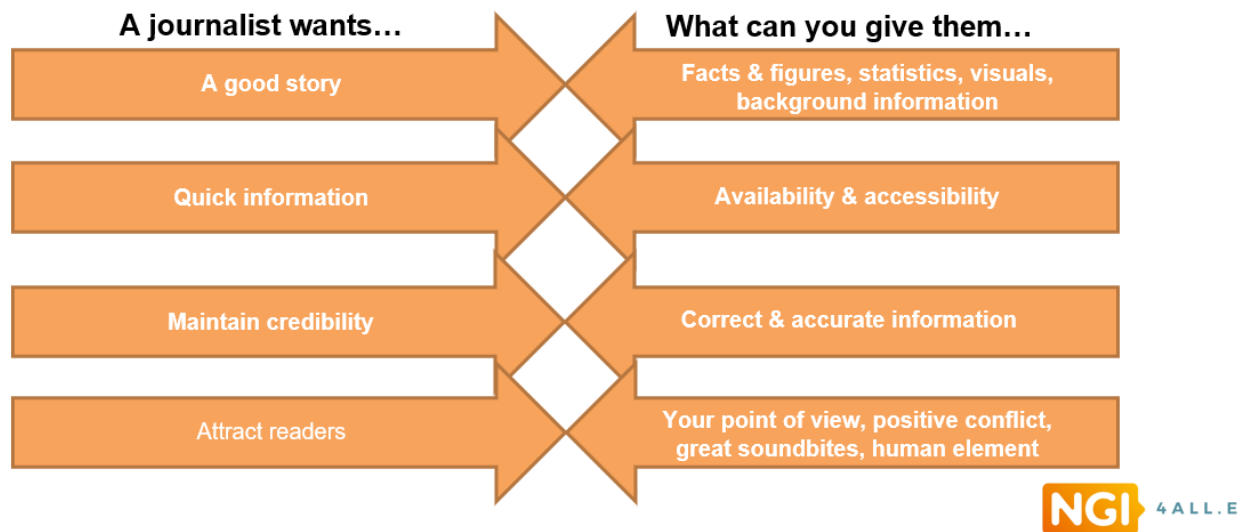

¹ Collins: "Churnalism is a type of journalism that relies on reusing existing material such as press releases and wire service reports instead of original research, esp as a result of an increased demand for news content."

² Cision, 2022 State of the Media <https://comms.cision.com/State-of-the-Media-2022-Interactive>

2.2 THE MEDIA RELATIONSHIP

Media is both an audience and a channel for NGI communication. Understanding the specific information needs of journalists is crucial for effective media relations.

FIGURE 3 : MEDIA RELATIONSHIP

The demand for PR partners who value journalists' time and provide effective communications has never been higher.

To cope with these challenges, we follow best practices when working with journalists, which include:

- Understanding journalists' target audiences and what they find relevant (content needs to be personalised as much as possible, avoiding a one-size-fits-all approach)
- Sending (very) short press releases, using links to direct journalists to additional information and online multimedia materials (avoiding attachments)
- Providing news well in advance, two weeks' notice is considered a minimum
- Providing short pitches with quick facts that allow journalists to create short-form content quickly
- A picture is worth a thousand words; foresee online, media-friendly visuals, including captions
- Being ready and able to respond quickly

3 MEDIA TARGETS

3.1 NGI MEDIA TARGETS

To reach our objectives and KPIs, we will focus our efforts on the following media publications in the relevant EU countries.

Type of publications

- **Technology trade publications:** focused on technology news and developments, they often have a strong readership among industry professionals and decision-makers.
- **General news publications** that cover tech developments: with a wide readership and covering a range of topics, including technology.
- **EU tech policy media and journalists:** covering technology policy and regulation, they are read by policymakers, regulators, and industry stakeholders.
- **Tech-focused blogs and influencers:** bloggers, social media influencers, and podcasters who cover technology topics and have a significant following.

Geographical scope

The key EU Member States to target for NGI media outreach will depend on a number of factors, including the news and milestones of NGI .

Here is the geographical targeting to consider for the first two years of our media plan, keeping in mind that we follow a tiered approach:

1. We liaise with priority contacts following a personal and tailored press activation approach in the following **11 EU Member States**, following a balanced geographical distribution across the European Union and a high outreach potential in tech publications and media content (investments in tech, research, startup hub locations, etc.): **Germany, France, Italy, Spain, Netherlands, Poland, Czech Republic, Romania, Estonia, Hungary, Greece.**
2. We engage with our **wider database of contacts in the 27 EU Member States** via the dissemination of press releases and media advisories to our targeted media lists in CISION.
3. We further engage with **EU Council Presidency countries** until July 2025, namely **Spain, Belgium, Hungary, Poland and Denmark.**

3.2 MEDIA AS AN AUDIENCE

Media outlets and journalists are both a channel and an audience in the context of the NGI communication strategy.

- As a channel, media outlets are a means through which NGI can reach its target audiences and communicate its key messages and values.
- As an audience, media outlets and journalists have their own information needs that differ from other NGI audiences.

Media outlets and journalists are often interested in breaking news and developments, so they are more likely to be interested in the latest developments and updates related to the NGI initiative.

Specialised media also have a greater appetite for in-depth and technical information, such as detailed explanations of how NGI technologies work and their potential applications. In addition, they may be more interested in stories related to the economic or societal impact of the initiative, or its potential implications for policy and regulation.

Therefore, to effectively engage with media outlets and journalists, the NGI Outreach Office will prioritise providing timely and relevant information that meets their information needs.

Information needs of journalists are the following:

- Timely and accessible information about NGI and its activities (early releases, online toolkit, easy access to NGI spokespersons, events and actions, etc.)
- Information about the impact of NGI and NGI-funded projects/technologies (data, facts, figures, etc.)
- Translations (where possible due to budget constraints)
- High-quality visuals and multimedia materials for article illustration purposes

NGI-funded projects have broader societal relevance: while NGI-funded projects are focused on technology, they could also have wider societal relevance in areas such as healthcare, education, or sustainability. This could make them relevant to general news publications.

We need to keep realistic expectations and recognise that not every general news publication will be interested in NGI-related stories. However, by crafting compelling and newsworthy stories, and targeting specific journalists who have shown an interest in technology topics, it's possible to generate media coverage in this area.

4 MEDIA MESSAGES

4.1 OVERARCHING MEDIA NARRATIVE

The key message targeted to media is that NGI continuously produces relevant outputs and contents, with the following sub-messages :

- NGI innovators success stories from across Europe, with relevant information on their impact at the local and national levels;
- a wide spectrum of ICT experts within the NGI ecosystem who can surely contribute to press features, contributing to tackling prominent societal challenges e.g., data privacy, health, inclusion, sustainability, etc.
- Citizens will benefit from the NGI solutions that are anchored on the European values of openness, sustainability, diversity etc.

To reflect the latest NGI positioning, we will update these three sub-messages with more data, more visuals, more human faces and stories, more testimonials from the ground, and emphasize the local scope of NGI.

4.2 TOPIC-SPECIFIC MESSAGES

Below are some possible priority topic areas for NGI's media narrative, along with suggested messages to relay to the media. When creating messages, it's important to be able to substantiate all claims with proof-points (preferably from public sources).

- **Human-centric AI:** Emphasize NGI's focus on enabling the development of AI technologies that prioritize human needs and values, rather than solely optimizing for efficiency or profitability.
 - *Draft Message: NGI fosters the development of AI technologies that can improve people's lives in meaningful ways.*
 - *Proof-point: 71% of EU citizens support the idea of establishing legal frameworks for the use of AI that protect human rights and democratic values. Highlight the fact that 84% of EU citizens are concerned about the impact of AI on their privacy.³*
 - *Facts and figures:*
 - *Examples of NGI-funded projects working to address bias and ensure transparency in AI development*
 - *Testimonials from individuals and organizations that have benefited from NGI-funded AI solutions*
 - *The economic and social benefits of responsible AI development, including improved efficiency, productivity, and fairness*
- **Decentralised Internet:** Highlight NGI's work on developing a decentralized internet that is more resilient, open, and secure.
 - *Draft Message: NGI works to create a decentralized internet that empowers individuals and ensures that everyone can participate in the digital economy.*

³ Source: Eurobarometer, 2021

- *Proof-point: we will mention the growing popularity of decentralized platforms like Mastodon and PeerTube, which offer alternatives to mainstream social media platforms, as well as highlight the fact that 87% of internet users in the EU are concerned about how their personal data is being used online.⁴*
- *Facts and figures:*
 - *Number of NGI-funded projects working on decentralized technologies*
 - *Examples of successful decentralized platforms and applications developed by NGI-funded projects*
 - *User feedback on the benefits of decentralized technologies, such as increased control and privacy*
- **Open-source Data:** Emphasize the importance of open-source data for driving innovation and unlocking new insights.
 - *Draft message: NGI supports the open data movement, which enables researchers and entrepreneurs to create new solutions that benefit society as a whole.*
 - *Proof-point: we will mention the fact that open data could generate up to €325 billion in additional economic activity in the EU by 2025.⁵ We will emphasize the benefits of open data for innovation, collaboration, and transparency across sectors.*
 - *Facts and figures:*
 - *The number of NGI-funded projects working on open data and interoperability*
 - *Examples of successful collaborations between NGI-funded projects and other organisations, such as universities, businesses, and government agencies*
 - *The impact of open data on innovation and economic growth*
- **Privacy and Security:** Highlight NGI's commitment to privacy and security in the digital age, and the importance of protecting personal data.
 - *Draft Message: NGI is dedicated to ensuring that individuals have control over their personal data, and that their privacy and security are protected in an increasingly connected world.*
 - *Proof-point: we will highlight the growing frequency and severity of cyberattacks, with the EU experiencing an average of 5,000 cyberattacks /day in 2020.⁶*
 - *Facts and figures:*
 - *Examples of NGI-funded projects developing innovative solutions to emerging cybersecurity threats*
 - *Testimonials from users who have benefited from NGI-funded cybersecurity and privacy solutions*
 - *The economic and social costs of cyberattacks and data breaches, and the potential benefits of investing in advanced cybersecurity and privacy solutions*
- **Digital Inclusion:** Emphasize the importance of ensuring that everyone has access to the benefits of digital technology, regardless of their background or circumstances.
 - *Draft message: NGI is working to ensure that everyone has access to the benefits of digital technology, and that no one is left behind in the digital economy.*

⁴ Eurobarometer, 2020

⁵ Open Data Institute, 2020

⁶ European Union Agency for Cybersecurity (ENISA)

- *Proof-point: We will highlight the 44 million Europeans lacking basic digital skills⁷, which is a major barrier to their participation in the digital economy and society and the additional €1.2 trillion in GDP growth by 2025 thanks to the closing the digital skills gap in Europe⁸*
- *Facts and figures:*
 - *Examples of NGI-funded projects developing innovative solutions for reducing digital gaps between communities*
 - *Examples of NGI-funded projects that promote digital inclusion, such as initiatives aimed at increasing internet access in underserved areas, or projects focused on making digital technologies more accessible to people with disabilities*
 - *Testimonials from NGI-funded project female founders or directors*

These are some possible priority topic areas for NGI media message development, and the suggested messages are meant to provide a starting point for crafting effective messaging that resonates with target audiences. Ultimately, the specific messages we want the media to relay will depend on the NGI-funded projects and initiatives that are currently underway, as well as the particular audiences we are trying to reach.

⁷ European Commission

⁸ Accenture

5 APPROACH AND MEDIA HOOKS

5.1 MEDIA RELATIONS APPROACH

We use a mix of “proactive” and “reactive” media relations in our approach with the media. Proactive media relations involve reaching out to journalists and other media professionals to share news and information about the initiative. Reactive media relations, on the other hand, involve responding to media inquiries and addressing any negative or inaccurate coverage.

Proactive media relations activities will include but are not limited to;

- **Press releases drafting and dissemination:** we will develop press releases that succinctly communicate news, developments, and milestones about the NGI initiative, making sure to include relevant quotes, images, and other multimedia assets.
- **Media pitches and interviews set-up:** we will search and identify journalists and media outlets that cover relevant topics and pitch them on stories related to the NGI initiative. This will include offering access to NGI spokespersons (NGI Unit, projects), providing data or research, or offering exclusive interviews.
- **Articles placement:** based on our experience with “who’s NGI” blog posts, we will identify relevant and newsworthy publications (from the content produced by the NGI Outreach Office for the website and social media) that reach the target audience and pitch them on the idea of a contributed article authored by a representative from the NGI initiative.

Reactive media relations activities will include but are not limited to;

- **Media response process:** we will develop a clear process for responding to media inquiries and interview requests. The process will be shared with the relevant NGI spokespersons and help the NGI Outreach Office handle press enquiries more quickly and efficiently to meet media needs. This procedure is of prominent relevance when reaching the EC representatives, as a way to answer the press in a timely manner.
- **Media interviews/quotes requests and enquiries handling:** the NGI Outreach Office will continue filtering and handling media requests on behalf of NGI.
- **Media monitoring:** Monitor media coverage of the NGI initiative using our media monitoring tool CISION. This will help us identify any negative or inaccurate coverage as well as any potential media opportunities.

5.2 INVOLVEMENT OF NGI-FUNDED PROJECTS

The NGI-funded projects are tangible examples of NGI’s work (facts, figures, developments). They can provide the local perspective and talk about NGI activities with local and national journalists. They will help to provide valuable content on their projects, as well as help the NGI Outreach Office to promote their work to a wider audience via media.

We will collect their background information, news and content (milestones, impact, facts and figures) with an objective of raising their awareness in targeted media. To achieve this, we will develop and share a template document that can be used by project owners for media purposes.

5.3 NGI SPOKESPERSON(S) FOR INTERVIEWS

To generate interest from journalists, the NGI Outreach Office will need to work with NGI spokespersons within the European Commission to offer interviews to media, especially around key news announcements.

The NGI Outreach Office will ensure that any spokespersons involved in NGI media outreach efforts are briefed and equipped ahead of any engagement with media. We will also document processes around their involvement to process media enquiries and interview requests in a smooth and efficient manner.

The process for interview requests will include the following steps:

- Check if the aim of the journalist is to cover NGI topics or to use NGI in order to cover EU policy or regulation information or statements (out of our scope).
- Redirect journalists to the EC Spokesperson Service when topics and questions go obviously beyond NGI 's remit.
- In case of written interviews, draft potential answers in cooperation with the NOO, and have them reviewed and validated by the NGI Unit prior to sharing with the media.

5.4 HOOKS FOR MEDIA OUTREACH

We list below some possible hooks for outreach and media activities by the NGI Outreach Office. By identifying opportunities for media outreach in advance, the NGI Outreach Office can capitalise on opportunities to generate visibility for NGI and capitalise on increased media interest around these moments.

1. **Industry events:** Attending or participating in industry events related to NGI or its focus areas can be a great way to raise awareness and engage with relevant stakeholders.
2. **Important policy milestones:** Marking important milestones or achievements can also be a powerful hook for media outreach.
3. **Launch of NGI-supported projects:** NGI-funded projects are the core of the initiative, and the launch of a new project could be a great hook for media outreach.
4. **NGI-related policy developments:** key policy developments related to the NGI initiative will be relevant for media activities.

In addition to the NGI Forums in 2023, 2024 and 2025, we list below potential hooks for media outreach by NGI with corresponding dates. These are suggestions only. The NGI Outreach Office will work with the European Commission to identify the best possible times as a function of the news announcements planned. The best hook/timing will also depend on the priority topic areas identified in the revised media narrative and related messages.

- 2023:
 - Safer Internet Day (February 7)
 - World Consumer Rights Day (March 15)
 - International Girls in ICT Day (April 22)
 - GDPR two-year anniversary (May 25)
 - Digital Assembly 2023 (June 7-8)
 - International Day of Universal Access to Information (September 28)
 - European Cybersecurity Month (October)

- 2024:
 - Data Privacy Day (January 28)
 - Safer Internet Day (February 6)
 - International Women's Day (March 8)
 - World Intellectual Property Day (April 26)
 - Digital Assembly 2024 (June)
 - World Youth Skills Day (July 15)
- 2025:
 - Safer Internet Day (February 11)
 - World Consumer Rights Day (March 15)
 - International Girls in ICT Day (April 24)
 - Digital Assembly 2025 (June)
 - European Cybersecurity Month (October)

In addition to these hooks, the industry events below could also be used:

- Mobile World Congress (MWC) - February/March (annually)
- Hannover Messe - April (annually)
- RightsCon - May/June (annually)
- Vivatech - June (annually)
- IFA Berlin - September (annually)
- Web Summit - November (annually)
- Slush - November (annually)

6 DESCRIPTION OF WORK AND DELIVERABLES

6.1 MEDIA PREPAREDNESS

Upon validation of the media approach, below we outline the key steps that the NGI Outreach Office will carry out to prepare for media outreach activities.

We foresee the following media preparedness actions.

1. **Review and update of the NGI narrative for use with media**, including key messages on priority topics, supported by proof-points (in line with the latest positioning statement, facts and figures about NGI). To address and inform this, a dedicated workshop with representatives of the EC will be held in April 2023.
2. **Update and develop NGI media lists**
 - Identify relevant media outlets in line with media plan
 - Review and update media lists and database via CISION, in 27 EU countries
3. **Identify and onboard potential NGI spokesperson(s) from the EC**
 - Share relevant contacts for NGI media work
 - Present the media plan and activities
 - Propose processes for their involvement
 - Propose process for the handling of interviews and requests
 - Draft briefing for interviews: description of the journalist, the publication, the goal of the interview; talking points, potential sources of controversy, timing and next steps
4. **Create and share template form for NGI-funded projects**, to collect updates and information that can be used for media outreach purposes
5. **Adapt the NGI press release template**
 - one page maximum, including boiler plate
 - should be concise, informative, and optimised for search engines
6. **Organise a bi-monthly media relations planning/progress meeting** with the EC spokespersons + relevant contacts + NGI outreach office

By undertaking these activities, the NGI Outreach Office will be prepared to engage with the media and communicate effectively about the NGI initiative and its work.

In parallel, the NGI Outreach Office continues ongoing media preparedness actions already planned, including;

1. **Identify and agree on potential hooks** for NGI media engagement and news dissemination
2. **Review and update NGI media page and toolkit on the website**
 - Add NOO press details
 - Review and update the NGI media toolkit: review and update media materials
 - Add invitation to NGI-funded projects to contact the NOO for press support

6.2 MEDIA OUTREACH

Keeping in mind that there are limited opportunities per year to generate media coverage, the NGI Outreach Office foresees the following new outreach activities.

- Article drafting and placement
 - 2 NGI articles per year in response to a media hook
 - 1 opinion editorial per year
 - Dissemination following a targeted and tailored approach
- Press releases drafting and dissemination (max 3 per year)
 - Increase the level of newsworthiness in the content
 - Draft and implement process for drafting/validation (press push concept note)
 - Dissemination + timing for dissemination (2 weeks advance notice under embargo is considered a minimum)
 - Include visuals/media
- Interview requests/handling with spokespersons (max 8 per year)
 - 6 to 8 interviews per year
 - Ensure a balanced distribution of countries
 - Apply process depending on questions (NGI-related only or beyond)
 - NGI-related only > NOO to draft answers and submit them to NGI Unit
 - Beyond NGI > NGI Unit to share questions with SPP
- Media briefing at NGI Forum (to be confirmed)
 - Liaise with stakeholders and co-create (-sign) media worthy news announcement(s)
 - Depending on the newsworthiness of the announcement, we could organise a live briefing with journalists at the event. The journalists' willingness to travel to the Forum and attend the briefing will depend on the attractiveness of the announcement.

In parallel, the NGI Outreach Office continues ongoing media outreach actions already planned, including following up on interview requests and liaising with the NGI project owners for press support.

7 MEDIA MONITORING AND REPORTING

7.1 MONITORING FOR COVERAGE AND REPORTING

The NGI Outreach Office will continue tracking and evaluating the results of its media outreach activities in several ways;

- Via our direct contacts with journalists
- Using our CISION media monitoring tool
- Using desk research to monitor for news via search engines

We will monitor the data related to the KPIs described in section 1.2. of this plan. We will do this by using several reporting tools;

- Media monitoring metrics and reports extracted from CISION (number of articles, reach, geographic spread of coverage, word cloud etc.)
- Media clippings book, media coverage sorted by country (Word document with screenshots of media articles or mentions with links to articles)
- Articles tracker, list of media articles sorted by date (Excel document with country of origin, Google translation of article if not in English etc.)
- Media interactions tracker, to record all media interaction and requests received for NGI, including interview requests and more personal contacts with media (Excel document with details of the interaction, name of journalist, publication, date etc.)

The NGI Outreach Office will prepare **activity reports** compiling the information and data above to share with the European Commission. In addition to **quantitative reporting**, we will also carry out a more **qualitative analysis** to identify any insights we can use for subsequent NGI media outreach activities. The reports will be delivered on Month 18 and Month 36 of the project (D3.2 and D3.3 NGI Outreach Activities Reports).

We will also share **top-level reports after each outreach activity** on behalf of NGI and provide updates to the NGI Communication Taskforce and NGI spokespersons on the implementation of the NGI media plan.

ANNEX 1 – GENERAL CONTACTS DATABASE
